

RECUPERADORA DEL CABLE Y GESTION DE RESIDUOS, S.L. (REDELCA) is a company dedicated to the recovery of metallic materials, essentially copper, bronzes, brass and aluminum, using waste that is valorized, recycled, and recovered, and which is to be transformed into raw materials and reused at national and international level.

REDELCA is leader in this sector of mechanical metal recovery. Since the early seventies, through grinding and shredding processes they have been able, since the early seventies, to provide with material for self-consumption, and nowadays are transforming for their own use and for third parties. Redelca, SL emerged in 1993, and through continuously investing in the future, improving the production facilities to increase productive capacity, agility and flexibility in the production process, reducing the environmental impact of the industrial process. At the same time, through researching all sources we search to reach excellent quality in our final product.

The activity considered by **REDELCA**, and according to the quality standards required according to ISO 9001: 2015 and ISO 14001: 2015 is

***Recovery and valorization of non-ferrous waste, recycling of cables.
Commercialization of non-ferrous metals***
