

RECUPERADORA DEL CABLE Y GESTION DE RESIDUOS, S.L. (REDELCA) is a company that is dedicated to the recovery of metallic materials, essentially copper, bronzes, brass and aluminum, using waste that we recycle, value and recover, to transform them into raw material and reuse them nationally and internationally.

REDELCA is a pioneer in this sector of metal recovery through mechanical processes. Since the seventies, we started for our own consumption and currently we transform for ourselves and for third parties. Since 1993, we have continuously invested in the future, improving our facilities to increase our production capacity, and our agility and flexibility in the production process, improving yields in our crushing process, and making many efforts to reduce the environmental impact generated by industrial activity. Likewise, the search for the best sources of supply at origin to ensure the product of excellent quality.

The activity that REDELCA considers in accordance with the quality required according to ISO 9001: 2015 and ISO 14001: 2015 is:

Cable Recovery. Non-hazardous waste management.

The Policy statement includes as guidelines:

1. Comply with legal and other requirements. Satisfy the demands, criteria and explicit and implicit expectations of our clients, carrying out the evaluation and application of these requirements.
2. Disseminate the Quality and Environment objectives and criteria at all levels of our structure.
3. Implement the quality and environmental indicators, as well as monitor their progress, in a way that allows us to know and ensure the service and the desired level of quality.
4. Develop continuous training programs to improve the qualification of our workers, involving all staff in the achievement of all the objectives established in this document.
5. Protect the environment, prevent pollution and minimize the real or potential impact on the environment, mainly on our significant environmental aspects such as energy consumption and emissions into the atmosphere.
6. Develop and improve current activities with an emphasis on saving energy and natural resources, as well as minimizing solid, liquid and gaseous effluents as a philosophy of pollution prevention and a commitment to improve environmental performance.
7. Consolidate the process of continuous improvement in the fulfillment of the activities carried out.

REDELCA's management makes this policy accessible and makes it available to its clients, employees, suppliers and to interested parties. The Policy is kept up to date through periodic reviews, coinciding with the reviews of the system by management, in order to take into account changes in environmental conditions and the information received. In this sense, the new management provides and will provide all the human, technical and financial means necessary to achieve the objectives that are established.
